## SIM Card IP+ & IP Voyager | Postpaid

SIM Card IP+ & IP Voyager is the SIM for Thuraya IP+ and IP Voyager terminals.

The Postpaid includes different plans with traffic included and different rates, according with the needs:

- On Demand price plans: Entry, Access and Value have a maximum download speed of 444 kbps; Usage in excess of the allowance will be billed over and above the subscription fee with the Data Rates prices.
- Unlimited price plans: Unlimited 144K and 444K have a maximum connection speed in download respectively of 144 kbps and 444 kbps. Once the traffic included is exhausted, it is possible to purchase any of the data bundles available. Otherwise the throughput will be throttled down at 32 kbps the 144K and at 64 kbps the 444K.

The subscription to a Postpaid plan is the ideal solution for those who require a satellite service always available anywhere and anytime, without the need to top-up the SIM Card.

The duration of the Postpaid refers to calendar months (from the first to the last day of the month). In the event that the activation of one SIM does not take place on day 1 (first) of the month, pro-rata is expected on all tariff profiles. The pro-rata, referred to both the monthly fee and to traffic included in the subscription, it will be applied until the first day of the calendar of the month following the activation.
