HUGHES

9211 is the robust and light High Data Rate terminal, ideal for governments and NGOs, medias, first responders, public safety and mobile health care workers, remote personnel in industries such as utility, oil and gas, forestry and telecommunication, needing the perfect balance between excellent performances, high quality of service and moderate prices.

Hughes 9211 supports high-performance broadband data transmission up to 492 kbps in Standard IP mode and up to 650 kbps in HDR Streaming mode, and offers integrated Wi-Fi access to multiple users. With the terminal it is possible to surf the internet through the Ethernet cable and/or via Wi-Fi 802.11 b/g/n network, while voice and fax services are available through the connection of an external telephone.

Hughes 9211 is IP-based and features a wide range of Class 1 bandwidths.

The LCD display, easy and intuitive, simplifies the aiming of the terminal. It is also possible to connect an external antenna for fixed solutions, or a vehicular antenna for mobile solutions.
