

895 Numbers

**BOOST YOUR PHONE BUSINESS
WITH OUR ADDED VALUE NUMBERS**

YOUR 895 NUMBERS

Numbers for Customer information and professional services

WHAT IS IT

The 895 Value Added Numbers are Non-Geographic Numbers with special rates, dedicated to the provision of information, assistance and technical-professional services.

The service provides various types of numbering with both per minute and flat rates and, for each of these, different cost ranges for the caller.

This type of Numbering cannot be used for entertainment services.

HOW DOES IT WORK

The 895 Numbers can be reached from any fixed and mobile Italian Operators networks.

After dialing the Number, the call is picked up by the Intermatica intelligent network node.

Based on your default settings, the Intermatica network performs the following operations:

- › informs the Customer through a free message about type and cost of the service
- › provides any automatic interactive IVR services
- › routes the call to landline or mobile numbers, based on the routing plan
- › interrupts the call when the maximum connection time required by current legislation is reached

With the real-time management panel you can:

- › view incoming calls
- › indicate on which telephone numbers to make the call arrive (you can choose fixed and/or mobile numbers)
- › create time slots and assign each of these a different telephone number on which to route the call
- › check and download call statistics

HOW TO ACTIVATE

To activate a Premium Numbers or get more information on the costs of the service dedicated to you, please call us at the number (+39) 06 853695 or write us to at premiumline@intermatica.it.

We will help you choose the number 895 that's right for you.

VAT Excluded

Premiumline is the Intermatica Business Unit specialized in **Value Added Numbers, Toll Free Numbers** and the development of **ad hoc solutions**.

Reliable Partner for those who work in the telephone business market, we offer our Customers a complete, flexible and scalable service, adapting to different needs.

The qualified and professional team creates customized solutions and follows every phase of the project.

From the choice of services to the **quick and secure activation** of numbers, from the configuration of the management panel to **24/7 technical assistance**, guaranteeing **100% payment** for all calls and **no KO problems** related to the voice service.

With a consolidated and uninterrupted presence over time, we are a pioneer company in Italy for the use of VoIP technology to serve communications and the first telephone operator to be IP interconnected to all national exchanges with Telecom Italia.

The advanced and secure network infrastructure is based on IT systems controlled by Intermatica and entirely developed in Italy, with direct interconnections with the most important national and international operators. The infrastructure is installed at the Avalon Telehouse in Milan Caldera and at the NaMex - Mediterranean interchange point in Rome; soon, also at the Wind Data Center in Rome-Tor Cervara.

Today Intermatica boasts experience and know-how synonymous with quality and guarantee towards the Customer, to whom an integrated, effective solution is always offered with the lowest possible operational impact.
